Technological additives per kg:

31,4 mg Sepiolite (E562)

Composition:

Maize, beet molasses pulp, dried, barley, rapeseed meal, stock, soybean extraction meal (HP), stock, dehulled seed, steam-heated, oat hull bran, beet molasses, sunflower extraction meal, stock, rapeseed oil,

calcium carbonate, sodium chloride, calcium sulfate.

Product properties:

mawel Lämmerkraft is a tasty supplementary feed, which is especially suitable for rearing and fattening of goat and sheep lambs. It contains all the essential nutrients to support the health of your young animals and promote their rapid development. By using high quality proteins, in combination with a precisely adjusted energy content, you will achieve, in addition to a healthy development, an optimal fattening performance without the animals becoming fat. **mawel Lämmerkraft** can effectively support the dissolution of existing urinary stones and is additionally suitable for the reconditioning of ewes and rams.

FEEDING ADVICE:

Due to the higher content of additives, do not feed more than 47% of the daily ration.

Feeding recommendation:

- Lamb fattening in the barn: hay + **mawel Lämmerkraft** at free disposal.
- Lamb fattening on pasture: 0.5-1.0 kg depending on the quality of the basic feed.
- Lambs rearing in the barn and on pasture: max. 0.5 kg / animal and day.
- For conditioning (flushing) of the ewes: +0.5 kg/animal/day in addition to the usual ration.

Available in 25 kg bag
